TAYLEN ANDERSON

Proper Inventory management is key to any business. What if there was a product that contained a full suite of tools, options and inbuilt systems that gives you complete control of your inventory.

This is stockIT!

TIMOTHY PRAST

stockIT is a platform that allows businesses to keep track of their inventory from the day of purchase to the point of sale and everything in between.

A system designed to make the complex world of inventory management a second thought.

With stockIT, you'll never run low on supplies and products again, always keeping your customers happy.

TETSU WATANABE

StockIT is designed to scale with your business from the ground up, a must for the Retail and Hospitality sectors. The software is integrated into your point-of-sales system.

stockIT offers a clean and easy to use interface which uses simple drop-down menus and click through commands, allowing you to spend less time with navigation and more time focusing on work that really matters.

BRANDON MCPHERSON

Unit profiles offers custom tailored inventory management which is key for getting the most value out of their inventory management.

With Unit profiles, you can track things such as stock keeping units (SKU's),

Storage SILO availabilities,

recipe and ingredients,

alert statuses,

supplier and purchase information and more.

With stockIT's clever data driven approach, you'll get to see in real time tracking and reporting, providing you with data to improve decision making.

So... where is all this data stored then?

stockIT gives users the option to store their data into the cloud, taking the administrative overhead away from the business, giving you more money to invest in improving your business.

StockIT has sophisticated subscription models to fit any business needs. The app can be downloaded via the app store for free.

The “Starter” plan as the name implies, gets businesses started right away. Features include Inventory counting Unit Profiles and Inventory functions. You will not have to worry about any costs with this plan as it is free for as long as you need it.

The “Established” plan will support up to 10 user accounts and include 24/7 customer support. Features include Inventory, Point-of-Sales integration, and a reporting suite.

The “Thriving” plan will support up to 15 user accounts and allows for AI integration and personalised onboarding set-up. This plan includes a load of new features such as supply and product tracking just to name a few.

The “Enterprise” plan is the full package! it is our premium plan giving you our full list of features and offers total business customisation, no matter how complex your business may be.

HUGO HUGHES

Artificial Intelligence is an up-and-coming trend we see in most businesses today and stockIT is no different.

With AI, stockIT can learn and predict a user’s purchase and supply behaviours, predict lead-times, offer deployment advice, and give advanced warning of overstocks and shortfalls in inventory on hand.

AHMET AKGUN

Inventory management doesn’t have to be complicated and with stockIT, you can take your business to new heights.

Small to medium businesses now have the ability for complete oversight of their inventory, once only accessible to large corporations.

Don’t lose it. stockIT!
